ShiftCare — Elevator Pitch

Updated: April 2026

One-Liner

ShiftCare fills open healthcare shifts in hours, not days — with same-day pay for workers and zero agency markups for employers.

The Problem (30 seconds)

A nurse calls out sick at 6 AM. A CNA no-shows. A home health patient needs coverage by noon.

The agency scrambles — calling down a phone list, texting personal contacts, posting on job boards that take days. Traditional staffing agencies charge 30-50% markups.[3] Per diem workers hear about shifts through group texts and discover they were filled hours ago.

$12 billion is lost annually to unfilled healthcare shifts in the U.S.[1] In Florida alone, 30,000+ healthcare positions sit unfilled[2] while qualified workers can't find flexible shifts that pay on time.

The Solution (30 seconds)

ShiftCare is a shift fulfillment platform — not a job board, not a staffing agency — purpose-built for home healthcare.

For employers: Post a shift in 30 seconds. Our matching algorithm notifies qualified, verified workers in your area instantly. Average fill time: under 30 minutes. One worker per shift, guaranteed — no double-booking, no confusion.

For workers: Browse shifts with transparent pay breakdowns, accept with one tap, get paid the same day. See exactly what you'll earn before you commit. No applications, no recruiter calls, no two-week pay cycles.

For families: Find verified, background-checked caregivers for your loved ones. No contracts, pay by the hour, see ratings and credentials upfront.

What We've Built

ShiftCare is not a prototype. It's a **production application** deployed and operational:

- **Intelligent shift matching** — 8-signal recommendation engine (role, location, pay history, availability, urgency, familiar providers, freshness, same-day pay preference)
- **Same-day pay** — employers toggle it per shift; workers get paid within hours of completion
- **Credential verification** — automated expiry tracking with 60/30/14/7-day alerts; provisional access while verification completes
- **3-strike reliability system** — no-shows and late cancellations reduce visibility; 90-day decay rewards good behavior; applies to both workers AND employers
- **Geofenced clock-in/out** — location-verified time tracking with actual vs. scheduled hour comparison
- **Multi-metric ratings** — workers rated on Punctuality, Professionalism, Skill; employers rated on Communication, Environment, Payment, Fairness
- **Preferred worker invites** — employers build trusted teams and give them first access to new shifts
- **Complete payment infrastructure** — Stripe Connect escrow (hold on accept, release on complete, refund on cancel), subscription billing, break-even calculator
- **4 notification channels** — in-app, email, SMS, web push

- **Full employer suite** — dashboard analytics, bulk operations, shift templates, recurring shifts, worker search with filters
- **Full worker suite** — earnings dashboard with charts, documents/receipts with CSV export, schedule management, credential status dashboard
- **SEO foundation** — 5 indexed articles, per-page OG images, sitemap, robots.txt
- **13 public marketing pages** — homepage, pricing (interactive toggle + comparison table), /for-workers, /for-families, /about, /contact, /resources, /demo

---

How It Works

1. **Employer posts a shift** — role, time, location, pay rate, same-day pay toggle
2. **Workers get matched** — our algorithm scores and surfaces the most relevant shifts per worker
3. **Worker accepts with one tap** — atomic transaction locks the assignment (no double-booking)
4. **Worker clocks in** — geolocation verified, shift status goes to In Progress
5. **Shift completes** — worker clocks out, employer confirms, payment releases
6. **Both parties rate each other** — multi-metric ratings build trust for future shifts

---

Why It's Different

ShiftCare	Traditional Staffing
Shift filled in 30 minutes	2-5 days
10% worker fee, transparent	30-50% agency markup, opaque
Same-day pay option	Biweekly pay cycles
Workers choose their shifts	Shifts assigned by dispatcher
Automated credential tracking	Manual phone verification
Both parties rated	No accountability
$49-149/mo flat subscription	Per-placement fees ($500-2,000)[9]

Business Model

Three revenue streams:

1. **Employer subscriptions** — Free (3 shifts/mo), Starter $49/mo (25 shifts), Professional $149/mo (unlimited). Annual billing saves 20%.

2. **Worker service fee** — 10% deducted from every payout (transparent, shown before acceptance). At $200 average shift: $20 per shift.

3. **Employer per-shift surcharge** — Non-subscribers pay 15% per shift. Creates natural upgrade path: 4+ shifts/month and the Starter plan saves money.

Unit economics: $30 blended revenue per shift. At 2,400 shifts/month: $72K MRR.

Future streams: Premium shift placement, background check fees, training marketplace, payroll integration, in-app advertising, workforce analytics, white-label licensing.

Market Opportunity

Metric	Value
U.S. healthcare staffing market	$52 billion[4]
Annual cost of unfilled shifts	$12 billion[1]
Florida home health market	$8.2 billion[5]
Florida home health agencies	3,400+ licensed[6]
Florida 65+ population	5.1 million (22.3%, #1 in U.S.)[7]
Unfilled CNA/HHA positions (FL)	30,000+[2]

Target: $240M serviceable market in Florida. 1% capture in Year 1 = $2.4M.

Financial Projections

Year	Revenue	Key Milestone
Year 1	$280K	Florida launch, 180 employers, 600 workers
Year 2	$2.9M	Multi-state (GA, TX, CA), 1,000 employers
Year 3	$10M+	National presence, 3,000 employers
Year 5	$40M+	Market leader in per-diem home health

Valuation

$1.2 million pre-revenue — deliberately conservative for the current funding environment.

Post-2022 seed valuations contracted 30-50%. Current pre-revenue healthcare tech seeds: $2-4M (Carta, 2024). Historical comps adjusted for correction:

- Clipboard Health seed: $3M (2017) → ~$1.5-2M equivalent today[8]
- CareRev seed: $4.5M (2018) → ~$2.5-3M equivalent today[8]
- Nursa seed: $3.5M (2020) → ~$2-2.5M equivalent today[8]

$1.2M is **below the adjusted floor.** Supported by:

- IP replacement cost: $485K-705K
- Forward revenue (10x Year 1 ARR, 80% execution discount): $1.24M
- With pilot agency LOIs, valuation moves to $2-4M

The Team

- **Ralph Pierre** — CEO & Product Lead
- **Rose Jean Baptiste** — COO & Operations
- **Noelle Pierre** — CFO & Finance
- **Elle Pierre** — CMO & Growth

- **Kalocode** — Development Agency (Technology Partner)

Traction

- Production platform deployed at shiftcare-app-rho.vercel.app
- 174+ source files, 25,000+ lines of production TypeScript
- 20+ database models, 17 API endpoints, 4 automated cron jobs
- Full codebase audit: 24 bugs found and fixed, 32/32 regression tests passing
- Beta launch: June 2026 in South Florida (Fort Lauderdale, Miami, West Palm Beach)

The Ask

ShiftCare is launching its South Florida beta in June 2026. We're looking for:

- **Home health agencies** in Fort Lauderdale, Miami, and West Palm Beach to pilot the platform
- **Healthcare professionals** (CNAs, HHAs, RNs, LPNs) to join the worker marketplace
- **Families** seeking home care in Florida
- **Strategic investors** aligned with healthcare workforce innovation

---

Fill open shifts in hours, not days. Pay workers the same day. No agency markups.

That's ShiftCare.
